

COURSE OUTLINE – (FTT-CI-005)

FINEOS CUSTOMISATION I – TECHNICAL ARCHITECTURE

Overview

The FINEOS Technical Architecture is a suite of components which supports the development and deployment of the FINEOS Solution. This course provides an overview of the FINEOS TA, followed by an introduction to programming with Business Objects and an understanding of how this relates to the Technical Architecture.

Objectives

To provide attendees with an understanding of programming within the TA, this includes Business Object Entities, Persistence, Locking, Class Extensions and Configuration.

Who should attend?

Java developers involved in the technical development of the FINEOS Solution

Pre-requisites

Skills:

All attendees should be Java Developers with knowledge of J2EE

Courses:

FTB-F-001 – FINEOS GUI Overview – Front Office

FTT-CI-002 – FINEOS Customisation I – Front Office Data Model

Formats & Duration

Delivery	Tutor-Led Practical	Duration	1½ Day
Description			
The desired effect for participants on completion of this course is an acquisition of skills i.e. to ' KNOW ' how to use a particular area of the FINEOS product. Participants are led through practical exercises relevant to the particular skills area directed and assisted by the tutor.
