

COURSE OUTLINE – (FTT-CI-006)

FINEOS CUSTOMISATION I - PORTAL INFRASTRUCTURE

Overview

This course details the FINEOS web application framework, focusing on the jsp and widget model. Participants are guided through practical exercises in creating and enhancing the FINEOS portal pages.

Objectives

Attendees are given an overview of the FINEOS Portal Infrastructure. The jsp widget model is covered in detail, specifically portal pages, widgets and beans.

Who should attend?

Java developers involved in the technical development of the FINEOS Solution

Pre-requisites

Skills:

All attendees should be Java Developers with knowledge of J2EE

Courses:

FTB-F-001 – FINEOS GUI Overview – Front Office

FTT-CI-002 – FINEOS Customisation I – Front Office Data Model

FTT-CI-005 – FINEOS Customisation I – Technical Architecture

Formats & Duration

Delivery	Tutor-Led Practical	Duration	3 Days
Description			
The desired effect for participants on completion of this course is an acquisition of skills i.e. to 'KNOW' how to use a particular area of the FINEOS product. Participants are led through practical exercises relevant to the particular skills area directed and assisted by the tutor.
