

## COURSE OUTLINE – (FTT-CII-003)

### FINEOS CUSTOMISATION II – E-FORMS

#### Overview

The FINEOS e-Form is an electronic form that is used to extend the data capture functionality of the FINEOS application. This course gives an overview of the e-Form configuration and examines the relevant data model, the FINEOS e-Form Tag Library used by e-Form jsps and the storage of the captured e-Form data.

#### Objectives

To provide attendees with practical knowledge on creating and enhancing e-Form jsps as well as an understanding of how e-Form data is stored.

#### Who should attend?

Java developers involved in the technical development of the FINEOS Solution

#### Pre-requisites

##### Skills:

All attendees should be Java Developers with knowledge of J2EE

##### Courses:

FTB-F-004 – FINEOS GUI Usage – Front Office

FTT-CI-002 – FINEOS Customisation I – Front Office Data Model

#### Formats & Duration

Delivery	Tutor-Led Practical	Duration	1 Day
<b>Description</b>			
The desired effect for participants on completion of this course is an acquisition of skills i.e. to <b>'KNOW'</b> how to use a particular area of the FINEOS product. Participants are led through practical exercises relevant to the particular skills area directed and assisted by the tutor.
