

Abilita® on FINEOS

Data you can Trust Outcomes you can Measure

Who Are We

FINEOS provides core claims management systems for Life, Accident and Health Insurance globally.

Abilita® provides evidence-based biopsychosocial injury management resources.

The Executive Mandate

Modern regulators demand more than just procedural compliance; they require demonstrable proof of latest evidence-informed practices.

To safeguard your organisation, show a commitment to a biopsychosocial approach and tailored, person-centric claims management.

Uplift case management capabilities with embedded psychosocial guidance and consistent recovery pathways for at risk claims.

The Enterprise Solution

The FINEOS Platform, in partnership with Abilita®, delivers a cloud-native, high-performance solution built to operationalise biopsychosocial care across complex carrier environments.

Embed validated assessment tools directly into the claim lifecycle to ensure your data stands up to the most rigorous scrutiny.

The Strategic Pillars

Biopsychosocial Care at Scale

Abilita®'s industry leading tools are available as a content package for FINEOS AdminSuite for claims, embedding the toolkit into existing workflows to guide high-value interventions.

Transparent Reporting

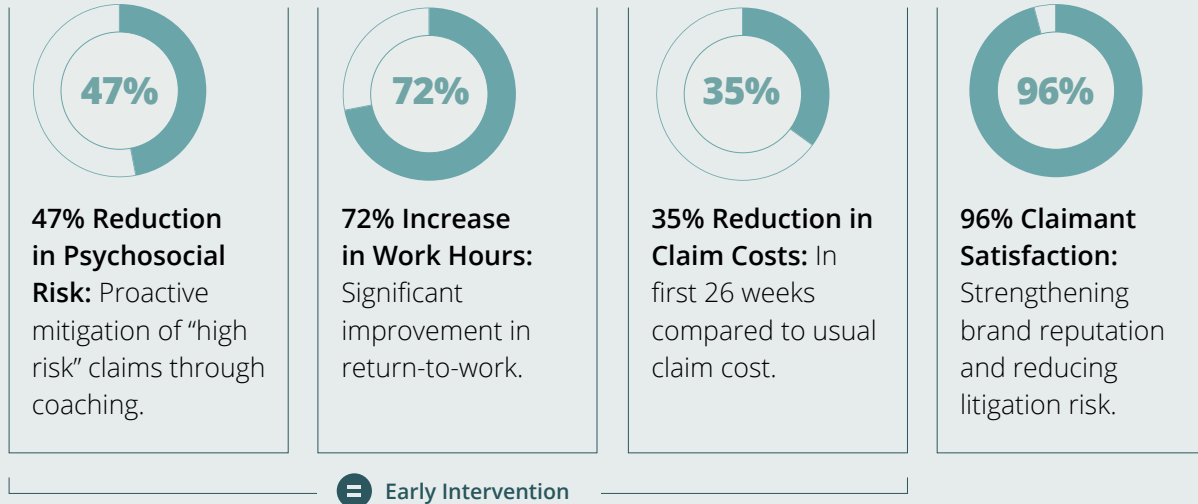

Built-in capabilities allow your team to baseline, track, and demonstrate improved recovery outcomes and enhanced customer satisfaction for all stakeholders.

Data Integrity and Baselines

The FINEOS platform captures and secures data across core biopsychosocial domains including pain, function, and work perceptions enabling precise measurement of change over time.

Future-Proof Architecture

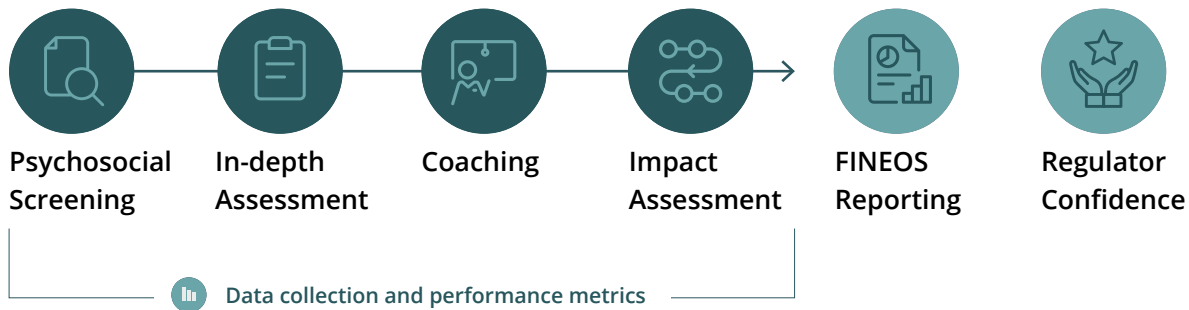

Designed for global scale, the FINEOS platform utilises role-based automation and API-driven integration to ensure continuous compliance with evolving regulatory standards.

The Executive Mandate

Consistent and rigorous adoption of a biopsychosocial approach is not just a clinical preference it is a financial imperative. The FINEOS and Abilita® partnership delivers measurable results that positively impact claim, claimant and insurer outcomes.

"The full benefits of early identification and psychosocial matched care will only be realised when the approach is embedded in the claims platform, ensuring consistent application driving improved recovery and operational outcomes."
Dr. Pam Garton

Measure and leverage biopsychosocial data to optimise your claims performance and secure your regulatory standing.

Partner with FINEOS and Abilita® to deliver biopsychosocial solutions that transform outcomes.

Market Leadership & Advocacy

Our solution aligns with the "It Pays to Care" framework, recognised as the biopsychosocial best practice standard. This approach is championed by Dr. Pam Garton, a leading voice in biopsychosocial innovation, co-author of the 'Best Practice Guide for Psychosocial Matched Care'.
