FINEOS Insight

Real-time analytics. Effective visualizations. Data-driven decisions. Experience the power of integrated machine learning.

As part of the FINEOS Platform, FINEOS Insight provides cloud-native, SaaS-based capabilities needed to deliver cutting-edge insights that influence business decisions and drive better outcomes. With patent pending machine learning solutions designed specifically for Life, Accident and Health insurance, FINEOS Insight transforms the ways in which you manage your business.

Embedded Analytics Integration
Real-Time Recommendations

FINEOS Predictive Models™ provide AI-boosted straight through processing and recommendations.

Auto adjudication
Identify cases that can be automated without examiner intervention.

Dynamic segmentation
Automate assignments based on risk complexity, availability and skill levels.

Propensity to purchase and sentiment analytics
Increase sales and retention.

Identify inconsistencies and potential fraud
Automatically review applications, transactions and other disbursements from employees, distributors and third parties.

Business Driven Insights
Implementation-Ready

FINEOS Machine Learning™ models are insurance-specific and are continuously improving as your business evolves.

FINEOS Claims Fraud
Detect potential fraud in short-term and long-term disability claims based on anomalies in the claims data.

FINEOS Claims Settlement
Identify long-term disability claims with a likelihood to settle based on claim attributes.

FINEOS Census Standardization
Normalize census files using a standardized data model.

FINEOS Annuity Fraud Scoring
Assess annuity fraud likelihood based on application, distribution source, and employee connections.

FINEOS Bridging
Identify short-term disability claims most likely to become long-term.

Intelligent Guidance
Differentiate with Data

Out-of-the-box solution to standardize processes and data from all sources across the value chain.

Neural machine learning
Predict optimal data structures regardless of file formats using model-based approach.

Unsupervised machine learning
Detect anomalies in underlying data structures.

Full traceability and auditability
Increase transparency of models and data pipelines.

Deliberately designed architecture
Enable processes to be intuitive, standardized, repeatable, scalable and measurable.

FINEOS Insight provides cloud-native, SaaS-based capabilities to deliver data-driven business insights to inform decision making and improve results

Deliver Transformational Results

IMPROVES
Decision Making

- Enhance operational decision making with embedded, real-time analytics and recommendations
- Identify leads that are more likely to convert to sales faster
- Increase policy retention by taking remediation on policies predicted to lapse
- Assess past behaviors to target product recommendations and predict propensity to buy
- Boost consistency, transparency and accuracy of decisions through decision automation

REDUCES
Cost and Risk

- Lower cost, frustration and time from working with multiple, fragmented workflows and systems
- Identify potential fraudulent claims faster and more accurately, and flag them for investigation
- Improve data accuracy through reduced manual errors and automated error checking
- Decrease decision-making risk by having the right types of information available and accessible
ACCELERATES
Innovation

- Provide an implementable, Opencore framework for legacy systems modernization
- Identify and extrapolate anomalies and trends faster with embedded analytics
- Leverage FINEOS Machine Learning™ to identify performance improvement opportunities
- New products and features can be implemented faster in line with top business priorities
- Increase flexibility and ease of doing business with partners and vendors
The FINEOS Platform
The foundation for your digital insurance strategy
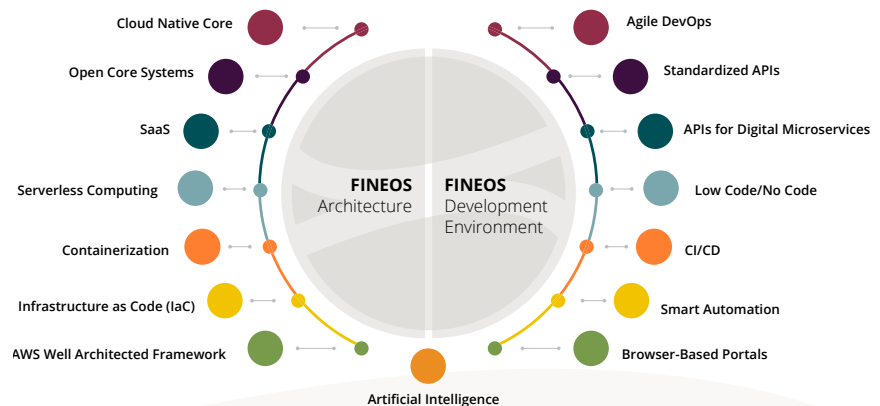

FINEOS AdminSuite

FINEOS Engage

FINEOS Insight

The FINEOS Platform seamlessly blends the rich features of FINEOS AdminSuite, FINEOS Engage and FINEOS Insight to create the most modern single core insurance platform for Life, Accident and Health.

FINEOS Architecture
- Cloud Native Core
- Open Core Systems
- SaaS
- Serverless Computing
- Containerization
- Infrastructure as Code (IaC)
- AWS Well Architected Framework

FINEOS Development Environment
- Agile DevOps
- Standardized APIs
- APIs for Digital Microservices
- Low Code/No Code
- CI/CD
- Smart Automation
- Browser-Based Portals

Artificial Intelligence

About FINEOS Corporation

FINEOS is a leading provider of core systems for life, accident and health insurers globally with 7 of the 10 largest employee benefits insurers in the US as well as 6 of the largest life insurers in Australia. With employees and offices throughout the world, FINEOS continues to scale rapidly, working with innovative, progressive insurers in North America, Europe, and Asia Pacific.

The FINEOS Platform is the only purpose-built, end-to-end SaaS insurance solution for the life, accident and health market. The FINEOS AdminSuite delivers industry leading capabilities across core administration including absence management, billing, claims, payments, policy administration, provider management and new business and underwriting; all of which are configurable to operate independently or as one suite. The machine learning enabled FINEOS Engage solution enables robust people first digital engagement pathways and the FINEOS Insight solution provides predictive analytics and reporting across the business.
