

COURSE OUTLINE – (FTT-CII-005)

FINEOS CUSTOMISATION II – RULES MANAGER – JAVA RULES

About This Course

FINEOS Rules Manager provides for the configuration of events and the associated rules that may be fired when these events are raised within the FINEOS application. This course examines the built-in events within the FINEOS product and also describes how new events may be configured within the application or may be written into the code using the FINEOS Events API. The course focuses on Java Rules, which are pieces of Java code that can be executed when an associated event is raised, and also details how Java Rules may be invoked from FINEOS Expression Rules.

Course Objectives

To provide attendees with practical knowledge of writing Java Rule code, using the Events API and configuring rules and events using FINEOS Rules Manager.

Who Should Attend?

Java developers involved in the technical development of the FINEOS Solution

Pre-requisites

Skills:

All attendees should be Java Developers with knowledge of J2EE

Participants of this course must have previously completed the following FINEOS training modules:

FTB-F-007 – Rules Manager

FTB-F-006 – FINEOS Configuration Studio

FTT-CI-005 – Programming with FINEOS Business Objects

Summary Of Course Contents

Module	Description
Java Rules	<ul style="list-style-type: none"> Defining Java Rules, contrast to Expression rules, data types, use of Java Rules, input Parameters and versioning using Expression rules
